

Product Discontinuation

HW3.2 Collaborative Robots

TM5-900, TM5-700, TM12

TM14, TM16, TM20, HW3.2

Food Grade Grease Units

Recommended Replacement

HW5.0 Collaborative Robots

**TM5S, TM7S, TM12S, TM14S,
TM20S**

**No recommended
replacement for
TM16 and HW3.2 Food Grade
Grease Units**

[Final order entry date]

The effective date for all customers outside Europe is **March 31st, 2027**. For customers in Europe, the effective date is **December 1st, 2026**, in accordance with applicable machinery regulation requirements.

[Date of The Last Shipping]

The effective date for all customers outside Europe is **April 30th, 2027**. For customers in Europe, the effective date is **December 31st, 2026**, in accordance with the applicable Machinery Regulation requirements.

The last shipping date refers to the date the units are shipped to customers

[Scheduled date of maintenance close]

Mar 31st, 2032

[Caution on recommended replacement]

From a compliance perspective, the HW3.2 series does not meet the mandatory requirements of the new Machinery Regulation (EU) 2023/1230. In contrast, the upgraded models in HW5.0X series, specifically the new HW5.04 series or later version, are the product family recommended by OMRON and will comply with the new Machinery Regulation (EU).

For optimal performance and safety, we recommend using the recommended Cobot bundles. The HW5.0 Cobots, released by OMRON Robotics since April 2023, are safer, more functional, and more powerful units. These new Cobots are fully compliant with ISO 13849-1:2023, PL d, Category III and operate within the TMFlow 2.XX software environment.

We offer most of the main models from the HW3.2 series in the HW5.0 units, except for the TM16 and the food-grade grease series. In addition, several new main models have been introduced in HW5.0, including but not limited to the TM25S, TM30S, and TM6S.

From the software perspective, the HW3.2 Cobot is operated using TMFlow 1.88 or earlier. It is not recommended to run HW3.2 on the TMFlow 2.xx framework, as projects developed in TMFlow 1.88 may not transfer smoothly to the newer framework.

Also, HW5.0 only has 2 COM ports while HW3.2 has 3 COM ports. On HW3.2, the IO module has 2 ports (1 5-pin port and 1 8-pin port), On HW5.0 there is only 1 port with 12-pin port. HW3.2 has 1 extra Analog IO port

[Difference from discontinued product]
